**Mechanicsburg, Ohio**

DEAR SCOTT CUSTOMER:

It will soon be planting time and we feel quite a few do not have all their seed on hand ready to sow. Rail and motor freight deliveries have been exceptionally good and small quantities can be sent insured parcel post or by express. Make out your order and mail it today.

We think there is plenty of most varieties of seed for everyone. Of course, some minor items may run short and those who wait until the last minute might not be able to get exactly what they want. We have good supplies of practically every item ready for immediate shipment.

## OATS And SOYBEANS

Quite a few have written asking about seed oats. Clinton 59 and Clinton 11 are improved Clintons and are equal in all important respects. They are more uniform in height and ripening and yield as well or better than Clintons. Mindo, Columbia and Andrew are 4 to 5 days earlier than the Clinton varieties, not quite as stiff strawed but equal in test weight and yields. They are more suitable where earliness is desired. There is no one best variety and all are well cleaned, treated and ready to sow.

An increase in Soybean acreage is expected this year. We believe there will be enough seed of varieties such as Hawkeye and Lincoln, although there have been scattered reports from several states that some germinations have not been good. Inoculation is furnished without charge on all Soybeans.

If a friend can use a copy of "Soybean Production" let us know.

## HYBRID CORN

The quality of seed corn is tops and supplies are good. All has been carefully graded to plant without trouble. SCOTTS hybrid seed corn is treated to give added protection if soils are wet and cold at planting time.

There is a wide selection in each maturity class. Of course, we feel everyone should be using one or more of the SCOTT hybrids as they are superior in several important respects. With variations between seasons, soils, and insect and disease conditions several hybrids should be grown each year.

A SCOTT customer writes from West Virginia, "I have used SCOTTS Seed Corn for ten years and have never in that time been beaten by my neighbors for a large crop of high quality corn." Another from Michigan wrote, "We are very well pleased with SCOTTS corn. Have found stalks with 3 sound ears and have counted 8 stalks in a row of drilled corn each with 2 ears." Plant at least a part of your corn acreage with SCOTTS this year.

# TREATED HYBRID SEED CORN

SCOTTS Hybrid Corn has been graded for width, length and thickness and will plant easily and accurately in any make of planter. Ohio certified Hybrids not listed are available upon inquiry.

The round kernels are graded uniformly and will yield just as well as the flats but special plates are usually required for accurate planting. All corn is treated for added protection against disease.

OPEN POLLINATED—Early Butler—\$6.00 bu. Woodburn—\$6.00 bu. Lancaster Sure Crop \$5.50 bu.

ROUNDS—Only medium and large rounds are offered. Carefully graded, high in germination, produce strong plants, and will yield as well as flats at a saving in seed cost. The same grades are available each year.

SCOTTS 11—Slightly earlier than Ohio M-15. Large ears for an early hybrid. Has out-yielded Ohio M-15. Sound dark yellow ears. Suited to short season or late planting.

SCOTTS 22—The maturity of Ohio M-20 and M-34. Has outproduced its maturity class on many different farms. Good roots, sound ears, good quality fodder, dries out quickly.

SCOTTS 33—Maturity of K Hybrids. A real producer with disease and smut resistance. Easy husking, nice fodder, not as tall as K-24. Will pick clean and crib early.

**MARCH 10 - APRIL 10**  
**\$0.50 BU. DISCOUNT**  
On Corn Orders Of 3 Bushels Or More

SCOTTS 66—One of the best medium maturing hybrids in the corn belt. Disease resistant, husks easily, strong roots, high yields on a wide variety of soils.

SCOTTS 75—Slightly earlier and not quite as tall as most of the C Hybrids, blight resistant, sturdy stalks, large dark yellow ears, bred for handy size and high yields.

SCOTTS 99—Maturity of U. S. 13 and bred for more corn borer resistance and higher yield. Dark green color. Not quite as tall as U. S. 13. Good sized, sound ears.

EARLY SILAGE BLEND—A blend of the earlier maturing hybrids for short season use. Seed is uniformly graded and above 90% germination. Will plant 8-10 acres per bushel. Blends available only in flat kernels.

LATE SILAGE BLEND—A blend of the later maturing hybrids recommended for full season planting. Slight variation in maturity gives higher yields of balanced quality feed. May be used for crib corn.
